

Chuck De Costa

Need to figure a way to keep taxes down for retirees. Cap their taxes after they reach 65 years old so you don't tax them out of their homes.

We need more good clean business in our area to create more jobs, like the NASCAR race track which was turned down. That would have been a great company to come into our area.

Cut back on land use regulations and rules and Codes like Title 2 and 5 that violate the rights of citizens. Make those Codes comply with our US Constitution and Bill of Rights as of now they do not follow our Constitution and they violate our due process rights and state we are guilty until we prove ourselves innocent and do not allow for Jury trials as provided for in the US Constitution. That would be a way to improve the lives of the people of Kitsap County.

There are way too many regulations on how us citizens can use their land. This should be the land of the free not the land of regulations. Stop all these new land use regulations the ones that are very intrusive like seasonal wet lands, regulations on what trees I can cut down and new boundary no cut zones at the periphery of my land. Try enforcing existing regulations for septic systems dumping raw sewage into the hood Canal. I turned in two properties that were doing just that and no action was taken as the people were poor and if you closed them down you would have to take care of them you thought, they are both young working couples just living in trash.

Do not force retroactively people to conform to "new codes" and laws or rules on existing properties like the Gun Club on Seabeck Hwy is being forced to comply with new rules or be shut down. It was grandfathered in by the County Board of Supervisors years ago and the new county Board of Supervisors are trying to make them conform to new County Code rules/permits retroactively, which is against our US Constitution of implementing retroactive laws against its people. Do not implement new requirement on existing homes in our area for the same reason.
